

**CHRIS WILLIAMSON**  
**CEO**  
**505 MANUFACTURING**  
**BANGKOK, THAILAND**

Chris Williamson is an active investor, board member, and strategic advisor focusing on digital identity, artificial intelligence, and advanced manufacturing technologies.

Since 2012, Chris has held board roles within the banking and finance sectors, providing oversight and strategic direction at the board level. His understanding of banking products and infrastructure paved the way for his early entry into blockchain technology in 2017. He is a proponent for the integration of decentralized ledger technology to enhance security and transparency in personal identity, global trade and finance.

An advisor and investor in advanced manufacturing, his focus is on the intersection of physical systems and digital tools. His expertise extends into the development of Digital Identity (DID) frameworks and Artificial Intelligence (AI) tools, specifically how these technologies can be leveraged to secure physical infrastructure and protect against evolving cyber threats.

His commercial footprint and advisory reach are truly global, with active business interests spanning Oceania, Asia, Eurasia, North and Central Americas.
