

**Dana W Adams MBA, CISSP, CPP**  
CANADA

---

Presently a Senior IT Security Consultant working with Public Safety, "Smart City" initiatives and GTAC Chief Development Officer. Dana previously was Director of Security Services at TELUS, a leading International telecommunications company based in Canada. Dana oversaw multiple Canadian and overseas locations responsible for enterprise-wide physical and logical integrated access control systems, audit compliance, corporate investigations, event planning, business continuity, on-board screening programs, and law enforcement liaison work including Lawful Intercept, warrant and subpoena programs.

During his tenure with TELUS, Dana successfully developed and delivered the TELUS security plan for the 2010 Winter Olympic Games in Vancouver, established effective partnerships with Law Enforcement and Public Safety, redesigned and implemented a new executive protection program, and developed and delivered asset protection programs for network infrastructure, retail operations, supply chain security and data protection. The Security Services directorate has successfully transitioned from command and control to a strategic consulting partner with internal stakeholders, clients and both provincial and national law enforcement organizations. Ultimately a "Business Enabler" program with focus on an ESRM Enterprise Security Risk Management strategy.
